

THE PROBLEM: ?

How can we develop an easily controlled and monitorable

GUI - sensor system that can be installed?

MATERIALS:

- Environmental Monitor Bundle

CODING

LANGUAGES:

- React Native
- Javascript
- Variant of Vanilla C++.

ENVIRONMENTAL CONTROLS

ALLEN HIGH SCHOOL

Rishi Badal, Anish Choudhury, Mukesh Kalikaya, Shreyas Newa

[This is where we will put the pictures of our team]

WHAT WE OFFER:

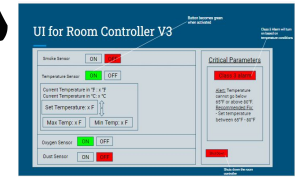

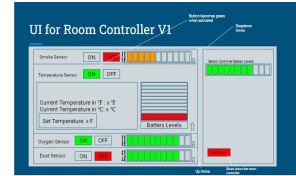

A practical and effective sensor system that can be easily used and applied in a lunar environment.

INITIAL UI DESIGNS:

Why we changed our initial designs:

We changed our initial designs to make our new designs more simple and easier to use than the initial designs.

NEXT STEPS:

- Implement the sensor system to function with the GUI
- Implement a functioning voice activation function on the sensor system
