Objectives:
To ensure that the product meets user needs and requirements through the identification of shortcomings and flaws in the product

Test Timeline:
The execution and recording of each test should take no more than 1 week. From there, data collected should be given to a manager, who will then distribute work and tasks accordingly.

Failed tests will be handled by developers according to their area of expertise.

Testing:
React Native UI:
Go through the buttons available to ensure that all buttons are working as they should.

Arduino IoT Cloud UI:
Please follow the steps in the User Guide to ensure all functions are working properly

Current Tests:
- Any bugs or flaws pertaining to the UI
- Arduino malfunction
